
a Evidence pipeline
official reports become reviewed, versioned research data
sources
provider A
provider B
rules & ledger
people
interface
decisions applied once · affected outputs rebuilt
01 CAPTURE
Official reports
WHO
ECDC
AFRO
NCDC
PAHO
UKHSA
EFSA
FAO
RIVM
Public, animal and food health bulletins
Versioned PDF and HTML snapshots
Publication and capture times kept
→ source packets
02 EXTRACT IN PARALLEL
Dual-provider extraction
ATLAS GUIDELINE
Provider A
gpt-6-astra
OpenAI
blind: drafts never shared
Provider B
claude-opus-5-5
Anthropic
Same packet, prompt, schema and chunks; pinned model IDs
Weekly agent jobs keep run receipts
→ two independent drafts
03 MATCH
Field matching
A
agree
B
FIELD RULES
pre-registered
Agree → agreed draft
Differ → adjudicate
Both scored against blind expert labels
→ drafts + disputes
04 DECIDE
Human review inbox
INBOX
Disagreement
Agreed draft
Identity
Adjudicate A ≠ B with both quotes
Approve agreed drafts and releases
Explicit edits for merges and splits
silence ≠ approval
→ sealed release
05 EXPLORE
ATLAS UI
qtj.me/atlas
ATLAS
One Health
Journeys
reporting window
travel
shared event
hypothesis
Signals
Hash-verified release handoff
Selections open quoted evidence
→ questions and feedback
next version
b Deterministic control plane
scripts, contracts and an append-only ledger bound every model step
release f60443f5 · contract 1.9.0 · atlas 0.1.0a49
QUOTATION ANCHORING
value → source span
carried into every view
ADAPTERS
allowlisted HTTPS
content-addressed
bounded fetches
CONTRACTS
same prompt, schema, chunks
read-only sandbox, no tools
pinned model IDs, cached runs
MATCH RULES
fixed before any run
no LLM judge
missingness explicit
LEDGER
append-only hash chain
explicit edits only
approval = exact hash
EXPORT
schema + reference checks
portable selector
sealed and replayable
